Ma. Angelica Concepcion
Software Engineer

Summary

Throughout my career, I have successfully maintained and supported existing projects while creating new modules and plugins to enhance functionality and user experience. I excel in addressing and resolving bugs promptly, collaborating with clients and project managers, and implementing improvements. My technical proficiency includes Laravel, CodeIgniter, NodeJS, ReactJS, VueJS, MySQL, and server management platforms like Heroku and AWS. With a strong focus on delivering high-quality code and adhering to coding standards, I bring a detail-oriented approach to every project. My freelance experience has further strengthened my ability to introduce new features and improve system performance. I am excited to leverage my skills and contribute to the success of your team as a FullStack Developer.

Work Experience

Oct 2022- Jun 2023 | ContactOut | Software Engineer

- Enhance the functionality of the current email campaign system by introducing additional features.
- Ensure the smooth operation of the system by promptly addressing and resolving bugs reported by customers and the quality assurance team.
- Collaborate with the team to generate innovative ideas for increasing the system's user base and engagement.
- Laravel, Inertia, React, Tailwind, Vite, Jest, PHPUnit, AWS

Mar 2021 - Oct 2022 | MindArc | Full Stack Developer

- Continuously maintain and support existing Shopify plugins, ensuring smooth operation and performance.
- Create new modules, apps, and plugins to enhance the functionality and user experience of the current store.
- Address and resolve any bugs, ensuring prompt and effective bug fixing. Regularly communicate with clients and project managers to discuss and propose improvements for the current store and scripts.
- Collaborate with third-party ERP (Apparel21, REX, PeopleVox) to successfully implement their API to our Shopify plugins.
- Laravel, Lumen, VueJS, React, Tailwind, Bootstrap, Shopify, GraphQL, MySQL

Feb 2020 - Mar 2021 | Penbrothers | Full Stack Developer

- Implement a range of features within the company portal to enhance its functionality and usability. Integrate third-party APIs such as XERO, ZOHO, and Google API to enable seamless data exchange and leverage external services.
- Take the lead in initiating and managing documentation within the team, including coding standards and Git practices.
- Provide training and supervision for interns, ensuring their successful integration into the team and facilitating their professional growth.
- PHP, NodeJS, ExpressJS, Tailwind, React, ReduxSaga, Google Cloud Platform, MySQL

⚙️ Side Projects

Xiclab Digital – Laravel Developer
- Collaborated with fellow developers to facilitate the transition from the legacy system to a new and improved portal/dashboard for the company
